4. The following is an examiner's statement of reasons for allowance:
5. The prior arts of record do not anticipate or render obvious to one skilled in the art a modulation optical system comprising various elements as claimed, more specifically (a) a wire grid polarization beamsplitter wherein sub-wavelength wires on the wire grid polarization beamsplitter face a reflective spatial light modulator wherein the reflective spatial light modulator selectively modulates the polarized light beam of light to encode data thereon and reflects both the modulated and unmodulated light to the wire grid polarization beamsplitter wherein the wire grid polarization beamsplitter separates the modulated light from the unmodulated light and a compensator located between the wire grid polarization beamsplitter and the reflective spatial light modulator conditioning the polarization states of the oblique and skew rays of the modulated beam and has a spatially variant retardance that corrects for a spatially variant retardance of the reflective spatial light modulator.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
